

Solamat 200 - Solid and compact dry cleaning with extractor

The sole cleaning machine Solamat 200 is designed for industrial applications. These types are equipped with four revolving brushes cleaning the soles and two lateral disk brushes do the same with the edges of the shoes. In addition, the upper leather brush cleans the upper shoe. Brushed off dirt falls into the large dirt collecting tray underneath the brushes. This tray can be easily emptied. The belt drive ensures tractive power and smooth running. The Solamat 200 model is equipped with an extractor and filter unit in the housing frame. The filter can be easily replaced.

Advantages

- Compact design
- Powerful, robust motor
- Smooth running on account of round belt drive
